

*The darkness within the circle represents
the condition in which a person finds him or herself
when dependent on or addicted to alcohol, nicotine
or other drugs. The candle represents the physician
whose skill, compassion and knowledge of the science
of Addiction Medicine assists the addicted
or drug dependent individual and family find new life,
signified by the rays of light.*

American Board of Addiction Medicine

Inaugural Diplomates Luncheon

American Society of Addiction
Medicine 40th Annual
Medical-Scientific Conference

Hilton New Orleans Riverside Hotel
New Orleans, Louisiana
May 2, 2009

The physicians named herein have
successfully fulfilled the requirements
for certification in Addiction Medicine
and are declared diplomates of the
American Board of Addiction Medicine.

Dear Colleagues,

Today you are being recognized as the very first Diplomates of the American Board of Addiction Medicine. This occasion is both a formal recognition of your dedication to patient care, and to your attainment of the highest level of expertise in our specialty. This expertise is unique in medicine, as you must masterfully combine science, skills and compassion in the care of patients with a challenging array of problems.

This occasion also marks a “coming of age” for addiction medicine, and you are in the vanguard of our movement to make addiction medicine a more widely recognized and respected specialty among patients, the medical profession and other members of the addiction treatment team. Together with peers, you are renewing a nation where drugs and alcohol have warped the public health and our healthcare systems. As you know so well, addiction specialists continuously strive to alleviate stigma, ignorance and neglect. Your interventions - simple and complex, social and technical – improve and save lives. Your efforts and professionalism strengthen families and communities, and give hope to the discouraged. And most importantly, you offer humane care to each unique individual you encounter. More physicians like you are desperately needed.

Today we also acknowledge the physicians who founded our field 55 years ago, and those who have worked since to advance it. Dr. Ruth Fox inspired a generation of physicians to take addictions out of the darkness, and so she has been a mentor to all of us. The membership and leaders of the American Society of Addiction Medicine have kept her candle burning bright, and also conceived and assisted in the creation of the American Board of Addiction Medicine. As you receive your Diplomate certificate today, we applaud you, and celebrate the progress we have made together. Congratulations!

Kevin Kunz, M.D., M.P.H., FASAM
President
American Board of Addiction Medicine

We are pleased and honored that Dr. Kevin Kunz and Dr. Nora Volkow will speak to the importance of the ABAM Diplomate and ABAM Certification.

Kevin B. Kunz, M.D., M.P.H., FASAM

Dr. Kunz is certified by the American Board of Preventive Medicine, and certified in Addiction Medicine by examination by ASAM. He has an active addiction medicine practice in Kona, Hawaii and is on the faculty of the University of Hawaii’s School of Medicine. He is the Program Director of Hawaii’s Physicians Health Program, and active in many community organizations promoting the prevention and treatment of alcohol and drug problems. Dr. Kunz has received local, state and national recognition for his community efforts in addiction prevention and treatment.

Dr. Kunz was elected President of the American Board of Addiction Medicine in March, 2009. He had served as Interim President from April, 2008. An ASAM member since 1995, Dr. Kunz has served as an ASAM Director, Chair of the ASAM Chapters Council, and Co-chair of the ASAM Medical Specialty Action Group.

Nora D. Volkow, M.D.

Nora D. Volkow, M.D., is the Director of the National Institute on Drug Abuse (NIDA) at the National Institutes of Health, since May 2003. NIDA supports most of the world’s research on the health aspects of drug abuse and addiction. Dr. Volkow’s work has been instrumental in demonstrating that drug addiction is a disease of the human brain. Born in Mexico, Dr. Volkow earned her medical degree from the National University of Mexico in Mexico City. Her psychiatric residency was at New York University, where she earned the Laughlin Fellowship.

Dr. Volkow previously was at the Department of Energy’s Brookhaven National Laboratory (BNL) in Upton, New York, where she held several leadership positions, including Director of Nuclear Medicine, Chairman of the Medical Department, and Associate Director for Life Sciences. In addition, Dr. Volkow was a professor in the Department of Psychiatry and Associate Dean of the Medical School at the State University of New York (SUNY)-Stony Brook. Dr. Volkow has received multiple awards, including membership in the Institute of Medicine in the National Academy of Sciences. She was recently named one of Time Magazine’s “Top 100 People Who Shape our World”, and was included as one of the 20 people to watch (in “Who’s Next in 2007”) by Newsweek magazine.
